

Deseret Power's Quarterly
Local Transmission Planning Public Meeting
June 28, 2010

Attendance:

Jim Tucker, Deseret Power Transmission
Clay Macarthur, Deseret Power Merchant
Marshall Empey, UAMPS

Introductions:

Local Planning Process:

The Local Planning Process for 2010 was reviewed. The NERC TPL standards assessment will be completed in August 2010. Since there are no system changes around the Bonanza area and since the studies over the past several years have given very similar results, the 2010 TPL assessment will be done by reviewing the past studies.

Discussion of the 2009 construction projects:

The new bonanza capacitor bank and the new 345 kV breaker in the ring bus were placed in service during 2009.

On June 17, 2010 I was notified that Moon Lake's under-voltage load shedding relays are in place and operational.

Deseret has no active transmission service requests.

The next meeting will be in September of 2010.
