

OASIS Conversion/Outage September 28, 2009

Important Announcement: OASIS Conversion Scheduled for September, 2009

As previously communicated, Entergy will migrate from the current *e-terrasolutions* OASIS system to the webOASIS application hosted by OATi and configured for Entergy. This conversion is scheduled for September 28, 2009. This updated announcement highlights the activities Transmission Customers and other users should complete before the OASIS conversion date. If you have any questions or concerns about the OASIS conversion, please contact Perry Faver at Entergy (501) 823-1604 or the OATi Help Desk at (763) 201-2020.

Update URLs

Transmission Customers and other users must update website addresses (URLs) used for Entergy's OASIS to the OATi webOASIS website address. This includes areas such as:

- Any Transmission Customer or user applications (API) that link to Entergy's OASIS website.
- Any automated communication processes with links to Entergy's OASIS website.
- Any automated process or application that depend upon data from Entergy's OASIS website.
- Any other procedural or programmatic process that references Entergy's OASIS website.

The following URL(s) may be used to reference the new Entergy OASIS from OATi:

The common OATi webOASIS URL is: <https://www.oatioasis.com>.

The Entergy Home Page URL on OATi is: <https://www.oatioasis.com/EES/index.html>

Please note that Transmission Customers and users will not be able to logon to the webOASIS application until your OATi account is registered with OATi and cooresponding activities are completed on the Entergy side. This account must be set up prior to the OASIS conversion date.

Access to Transmission Customer Testing Site

Registered users are encouraged to visit the Entergy home page on OATi's "demo" webOASIS to validate user access prior to the transistion date. Validating access on the demo site will help ensure that account will be configured on the production system.

The Entergy Home Page URL for the demo site is: <http://demo.oatioasis.com/EES/index.html>.

OASIS Certificate and Registration

You must have an OATi certificate and register that certificate prior to the conversion to the OATi OASIS. If you do not have access to OATi's webOASIS system, please contact the OATi Help Desk at (763) 201-2020 for assistance or email support@oatiinc.com. If you are not sure what your username or password is on the OATi system, the OATi Help Desk can assist you. For more information about certificate registration, refer to <https://www.oatioasis.com>

Pre-requisites to access Entergy's OATi site:

- Must have a certificate, username, and password registered with OATi.
- Must register for the OASIS product with OATi.
- Must be registered with the Entergy site administrator.

OASIS Conversion/Outage September 28, 2009

Planned OASIS Outage from 9/28/09 0100 CDT – 9/28/09 0800 CDT

The conversion plan calls for an OASIS outage beginning at 1am CDT September 28. The outage is expected to be completed by 8am CDT on Monday, September 28, 2009. Additional announcements will be provided as this plan is updated.

At the start of the outage, the current Entergy OASIS site will be converted to “Read Only” status and will no longer honor transactions for transmission service. This OASIS site will remain in “Read Only” status thereafter, and may be queried for information posted or entered prior to the conversion date for 90 days following. All transactions with an end date later than the conversion date will be transferred to the new Entergy webOASIS site.

Once the outage has completed, users must enter transactions for transmission service on Entergy’s webOASIS site. It is expected that all Transmission Customers have already verified their access to Entergy’s webOASIS “demo” site as described elsewhere in this announcement.

Prior to and during the planned OASIS outage, Transmission Customers should plan to submit service requests ahead of schedule as much as possible and have fax forms available to conduct business as detailed in the next sections.

Submit Service Requests Prior to Outage

In preparation for the OASIS conversion date, please make every attempt to submit all requests for service prior to the planned outage time. During the outage, requests will be accepted by fax, limited to the next hour’s non-firm service with one hour duration only. We anticipate this will impact only current day, non-firm customers.

Have a Copy of the Fax Request Form Available

Please ensure that you have a current version of the fax request form printed and available prior to the outage. Click on the link <http://oasis.e-terrasolutions.com/documents/EES/FaxForms.htm> and then click on the *OASIS Down Fax Form*. It is important that you print this prior to the outage since the OASIS system will be unavailable during the outage.

Access to e-terrasolutions OASIS following Entergy’s OASIS Conversion Date

Entergy’s current OASIS site, <http://oasis.e-terrasolutions.com> will continue to be available for queries and other support for a 90-day period following Entergy’s OASIS conversion date. Following the conversion date, this website will be available in read-only mode. No additional transactions will be allowed via the current OASIS site following conversion to the OATi OASIS.

Contact Information

We apologize for any inconvenience. If you have questions about the conversion, please contact Perry Faver at Entergy (501) 823-1604. The OATi Help Desk at (763) 201-2020 can help with user account setups and other access issues. On the day of the conversion, the ICT Tariff Desk may be able to help with unexpected issues. Please find the following phone numbers to call for assistance:

When	Who	Number	Comment
Anytime	OATi Help Desk	(763) 201-2020	Any assistance with account setup
Prior to 9/27	Perry Faver	(501) 823-1604	General questions about the conversion
9/28	ICT Tariff Desk	(501) 614-3502	Unexpected issues during the conversion
