

## **Real Power Loss Calculation**

As per allowed by the Georgia Transmission Corporation Transmission Service Tariff, Attachment G Real Power Loss Calculation, GTC has determined the actual average system losses have changed. Effective April 1, 2006, GTC adjusts the percentage allowance for losses to reflect actual average system losses are as follows:

<b>Service Level</b>	<b>Demand (1)</b>	<b>Energy (1)</b>
Bulk Transmission (voltage levels 69 KV and above)	2.27 percent	2.0 percent
Distribution (voltage levels Below 69 KV)	3.2586 percent	2.9081 percent

(1) Rounded to the nearest full MW
