## **Termination of coordination of transfer capability and modifications to documents**

Following the Régie de l'énergie's decision D-2012-069, Hydro-Québec TransÉnergie has terminated the coordination of transfer capability on its interconnections with neighbouring systems. In addition, some documents in the public section of Hydro-Québec TransÉnergie's OASIS have been modified:

- Guide to Business Practices for Hydro-Québec TransÉnergie Transmission Services:
  - The changes are described at the beginning of the document.
- Description of point of delivery/receipt MASS:
  - Table 1 – Addition of an example of the impact of equipment outages on TTC;
  - Section 2.3 – Deletion of the paragraph on coordination of transfer capability.
- Description of point of delivery/receipt HIGH:
  - Section 3 – Deletion of the paragraph on coordination of transfer capability.
- Description of point of delivery/receipt NE:
  - Section 2.3 – Deletion of the paragraph on coordination of transfer capability.
