

APPLICATION FOR GENERATOR INTERCONNECTION

To be used to qualify for generator interconnection under the Newfoundland Labrador System Operator's (NLSO) *Generator Interconnection Procedures*.

To be considered a Completed Application, an application must include the applicable security deposit as per Section 6.0 of the *Generator Interconnection Procedures*, as well as provide the information detailed below.

1. Identity of Applicant

Company Name: _____
Company Address: _____
City, Province/State: _____
Postal Code/Zip Code: _____
Contact Name: _____
Phone Number: _____ Fax Number: _____
E-Mail Address: _____

2. Eligibility for Interconnection

An Applicant must be approved as an Eligible Customer pursuant to Section 5.0 of the Generator Interconnection Procedures prior to the granting of any requested interconnection and commencement of such service.

Eligible Customer status approved? () Yes () No

3. Interconnection to be Requested

- () A proposed new Generating Facility.
- () A change in the generating capacity, modification of an existing Generating Facility, or modification of an existing point of interconnection.

4. Type of Interconnection Service Requested

- () Energy Resource Interconnection Service.
- () Network Resource Interconnection Service.

5. Required Technical Information (provide as applicable, as per Section 7.0 of the Generator Interconnection Procedures). **Applicant to designate any information requiring Confidential Protection.**

Address or location of the proposed/existing Generating Facility:

Location diagram for new Generating Facility and Transmission System attached?

() Yes () No

Name of existing Generating Facility (if applicable):

Installed Capacity for a new Generating Facility:

_____ MW _____ MVAR

Anticipated Capacity for a new Generating Facility at annual peak load:

_____ MW _____ MVAR winter at _____ °C

Projected Ultimate Capacity for a new Generating Facility:

_____ MW _____ MVAR summer at _____ °C

_____ MW _____ MVAR winter at _____ °C

Number of units required for a new Generating Facility:

Change in generating capacity of an existing Generating Facility:

Existing Output: _____ MW _____ MVAR summer at _____ °C

_____ MW _____ MVAR winter at _____ °C

Proposed Output: _____ MW _____ MVAR summer at _____ °C

_____ MW _____ MVAR winter at _____ °C

Approximate location of the proposed Point of Interconnection (optional):

Scheduled Commissioning Date (day, month, year):

Commercial Operation Date (day, month, year):

Initial Synchronization Date (day, month, year):

Requirements for Construction
Power, including:

- Real power (MW):
- Reactive power (MVAR):
- Date required (day, month, year):

Primary and Secondary Fuel
Sources:

General description of the
equipment configuration (attach
additional sheets as needed):

6. Additional Information

Please attach the technical information outlined in Appendix A of the NLSO Standard - *Technical Requirements for the Connection to the NL Transmission System*. **Applicant to designate any information requiring Confidential Protection.**

7. Statement of Applicant

I represent, on behalf of the applicant, that:

- The information and representations set forth above are true and correct to the best of my information, knowledge and belief and agree to execute an Interconnection Agreement (in the form posted on the NLSO OASIS) upon receipt of notification that the NLSO can provide the requested Generator Interconnection.

Authorized Officer Signature: _____ Date: _____

Printed Name: _____
