|--|------------------|----------------------|
| Number of new system impact study agreements delivered during the reporting quarter to entities that request transmission service.   | 0                | 1                    |
| Number of new system impact study agreements delivered during the reporting quarter to entities that request transmission service more than 30 days after the request for transmission service was received.   | 0                | 1                    |
| Mean time (in days), for all requests acted on during the reporting quarter, from the date when the request for transmission service was received to when the transmission service request status was changed to indicate that transmission service could be offered or that a system impact study was needed. | 53.0             | 63.0                 |
| Mean time (in days), for all system impact study agreements delivered during the reporting quarter, from the date when the the request for transmission service was received to the date when a system impact study agreement was delivered.   | 0.0              | 43.0                 |
| Number of new system impact study agreements executed during the reporting quarter.  | 1                | 1                    |
| Number of system impact studies completed during the reporting quarter.  | 1                | 5                    |
| Number of system impact studies completed during the reporting quarter more than 60 days after an executed system impact study agreement was received.   | 0                | 3                    |
| For all system impact studies completed more than 60 days after receipt of an executed system impact study agreement, average number of days study was delayed due to transmission customer's actions (e.g., delays in providing needed data).   | N/A              | 0.0                  |
| Mean time (in days), for all system impact studies completed during the reporting quarter, from the date when the executed system impact study agreement was received to the date when the system impact study was provided to the entity who executed the system impact study agreement.                      | 60.0             | 59.6                 |
| Mean cost of system impact studies completed during the reporting quarter.   | \$9,608.98       | \$6,894.48           |
| Number of transmission service requests withdrawn from the system impact study queue during the reporting quarter.   | 0                | 0                    |
| Number of transmission service requests withdrawn from the system impact study queue during the reporting quarter more than 60 days after the executed system impact study agreement was received.   | 0                | 0                    |
| Mean time (in days), for all transmission service requests withdrawn from the system impact study queue during the reporting quarter, from the date the executed system impact study agreement was received to date when request was withdrawn from the system impact study queue.                             | N/A              | N/A                  |
